

Why be concerned about Climate Change?

The rapid change in Earth's temperature is but one of the signs of the serious crisis that we now confront.

These long term shifts in temperatures and weather patterns, which we refer to as CLIMATE CHANGE, can affect our health, ability to grow food, housing, safety, and work.

How can we take part in addressing this problem?

A habit of 3 R's

Reduce, Reuse, Recycle

Saving Water

Every drop counts

Conserve Energy

Be polite, turn off the light

Travel green

Less footprints, more green

Let's get involved.

Be the solution to stop the pollution

Why be involved?

Saint Francis of Assisi reminds us that our common home is like a sister with whom we share our life and a beautiful mother who opens her arms to embrace us. As family of the Sacred Heart, we are called to respond “as One Body,” and desire to participate in the care of “our common home” – working against injustices, constructing peaceful interrelationships, and protecting the earth. Together we can be “*artisans of hope in our blessed and broken world.*”

***Our small steps need to be accompanied by global action.
This is what we hope would happen through COP26.***

What is COP26?

COP26 is the annual UN Climate Change Conference, currently being held in Glasgow, Scotland. COP stands for Conference of the Parties. The summit will be attended by the countries that signed the United Nations Framework Convention on Climate Change. It aims to have a chance at limiting global warming to 1.5°C, cutting global emissions to half by 2030 and reaching ‘net-zero’ by 2050.

Let us offer our time in prayer for this intention, follow it online and support this action that will mitigate the climate crisis.
